| Course Objectives | This course introduces fundamental programming concepts and computational thinking. It is designed to be language-agnostic, allowing instructors to teach using their preferred programming language, such as C or Python. The course covers basic programming constructs, problem-solving techniques, and introductory algorithms and data structures. | |
| Course Content | This course introduces students to the fundamentals of programming, starting with an overview of programming concepts and setting up the development environment. Students will explore block-based programming using Scratch, progressing from basic to advanced concepts, including event-driven programming. The course transitions into foundational problem-solving techniques through pseudocode and flowcharts. Core programming principles such as variables, data types, mathematical expressions, arrays, control flow constructs, loops, and functions are covered in-depth. Advanced topics include recursion and an introduction to object-oriented programming (OOP), emphasizing classes, inheritance, and polymorphism through practical implementation. The course integrates hands-on projects and tutorials to reinforce learning, culminating in comprehensive reviews to prepare for mid-term and final assessments. | |

| Wee | Weekly Schedule | | |
|-----|--|--------------------------|--|
| No | Topics | Materials/Notes | |
| 1 | Introduction to Programming | Lecture notes, textbooks | |
| | ☐ Introduction to the course and syllabus overview. | | |
| | ☐ What is a program? What is a programming language? | | |
| | ☐ Historical context and evolution of programming languages. | | |
| | ☐ Tutorial on setting up the programming environment and IDE installation. | | |
| 2 | Scratch - Basics of Block-Based Programming | Lecture notes, textbooks | |
| | ☐ Introduction to Scratch or Blockly. | | |
| | ☐ Understanding basic programming concepts using block-based | | |
| | programming. | | |
| | ☐ Creating simple projects to illustrate basic concepts. | | |
| 3 | Scratch - Advanced Concepts | Lecture notes, textbooks | |
| | ☐ Developing more complex projects using Scratch or Blockly. | | |
| | ☐ Introduction to event-driven programming. | | |
| | ☐ Transitioning from block-based to text-based programming. | | |
| 4 | Introduction to Pseudocode and Flowchart | Lecture notes, textbooks | |
| | ☐ Introduction to Pseudocode and Its Importance | | |
| | ☐ Writing Algorithms in Pseudocode | | |
| | ☐ Translating Pseudocode into a Programming Language | | |
| | | | |
| 5 | Variables and Data Types | Lecture notes, textbooks | |
| | ☐ Understanding variables, constants, and data types. | | |
| | ☐ Declaring and using variables in a chosen programming language. | | |
| | ☐ Tutorial on variable declarations and type usage. | | |
| 6 | Mathematical Expressions | Lecture notes, textbooks | |
| | Arithmetic operators and their usage. | | |
| | ☐ Writing and evaluating mathematical expressions. | | |

| Doküman No | MF.FR.003 |
|-----------------|------------|
| Revizyon Tarihi | 13.11.2024 |
| Revizyon No | 01 |
| Sayfa No | 3/7 |

| | ☐ Understanding operator precedence. | |
|-----|--|--------------------------|
| | ☐ Tutorial on constructing mathematical expressions. | |
| 7 | Arrays | Lecture notes, textbooks |
| | ☐ Introduction to arrays and their significance. | |
| | ☐ Declaring, initializing, and accessing array elements. | |
| | ☐ Tutorial on basic array operations. | |
| 8 | Mid-Term | |
| 9 | Control Flow Constructs: sequence, selection, and repetition | Lecture notes, textbooks |
| | Conditional Statements | |
| | ☐ In-depth look at if, else if, else statements. | |
| | ☐ Writing nested conditional statements. | |
| | ☐ Tutorial on using conditional statements to solve problems. | |
| 10 | Loops | Lecture notes, textbooks |
| | ☐ Introduction to loops: while, for, and do-while loops. | |
| | ☐ Using loops for iteration and repetitive tasks. | |
| | ☐ Tutorial on loop control statements: break and continue. | |
| 11 | Functions | Lecture notes, textbooks |
| | ☐ Understanding function definition and invocation. | |
| | ☐ Parameters and return values in functions. | |
| | ☐ Tutorial on writing and using functions effectively. | |
| 12 | Recursion | Lecture notes, textbooks |
| | ☐ Basic concepts of recursion. | |
| | ☐ Writing and understanding recursive functions. | |
| | ☐ Examples and applications of recursion. | |
| | ☐ Tutorial on debugging recursive functions. | |
| 13 | Object-Oriented Programming – Fundamentals – 1 | Lecture notes, textbooks |
| | Class Fundamentals | |
| | Introduction to classes and objects. | |
| | • Understanding the concept of instances. | |
| | Creating and using classes in a chosen programming language. | |
| | Practical examples of class implementation. | |
| | Inheritance | |
| | Understanding inheritance and its importance. | |
| | Implementing inheritance in practice. | |
| | • Examples of single and multiple inheritance. | |
| | Tutorial on creating and using derived classes. | |
| 14 | Object-Oriented Programming – Fundamentals – 2 | Lecture notes, textbooks |
| 1 1 | Polymorphism | Lecture notes, textbooks |
| | Introduction to polymorphism and its benefits. | |
| | Implementing polymorphism with method overriding. | |
| | Examples of polymorphism in a chosen programming language. | |
| | Practical applications of polymorphism. | |
| | Practical Implementation | |
| | Tractical Implementation | |

| | Combining classes, inheritance, and polymorphism in a project. Step-by-step guide to designing a simple OOP-based project. Hands-on practice with real-world scenarios. Debugging and testing OOP code. | |
|----|--|--------------------------|
| 15 | Finals | Lecture notes, textbooks |
| | ☐ Comprehensive review of all course materials. | |
| | ☐ Addressing student questions and clarifying concepts. | |
| | ☐ Preparation for the final exam. | |
| 16 | Final Exam | |

| Course Le | Course Learning Outcomes | | | | | |
|-----------|--|--|--|--|--|--|
| No | Outcome | | | | | |
| L1 | An ability to apply knowledge of science, mathematics, and engineering. | | | | | |
| L2 | An ability to design programs and algorithms | | | | | |
| L3 | An ability to work with multi-disciplinary teams. | | | | | |
| L4 | An ability to identify, formulate, and solve engineering problems. | | | | | |
| L5 | Take responsibility to solve unpredictable and complex problems encountered in applications as an individual and as a member of a team | | | | | |
| L6 | Plan and manage activities in teamwork | | | | | |
| L7 | An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. | | | | | |
| L8 | Can do research on interdisciplinary fields. | | | | | |

- i. Adequate knowledge in mathematics, science, and subjects specific to Computer Engineering; ability to use theoretical and applied knowledge in these areas to solve complex engineering problems.
- ii. Ability to identify, formulate, and solve complex engineering problems; ability to select and apply appropriate analysis and modeling methods for this purpose.
- iii. Ability to design a complex system, process, device, or product under realistic constraints and conditions to meet specific requirements; ability to apply modern design methods for this purpose.

| Sayfa No | 7 / 7 |

- iv. Ability to develop, select, and use modern techniques and tools required for the analysis and solution of complex problems encountered in engineering practice; ability to use information technologies effectively.
- v. Ability to design and conduct experiments, collect data, analyze and interpret results in order to investigate complex engineering problems or research topics specific to the discipline of Computer Engineering.
- vi. Ability to work effectively in disciplinary and multidisciplinary teams; ability to work individually.
- vii. Ability to communicate effectively in oral and written Turkish; knowledge of at least one foreign language; ability to write effective reports and understand written reports, to prepare design and production reports, to make effective presentations, to give and receive clear and understandable instructions.
- viii. Awareness of the necessity of lifelong learning; the ability to access information, to follow developments in science and technology and to continuously renew oneself.
- ix. Acting in accordance with ethical principles, professional and ethical responsibility awareness; knowledge of standards used in engineering applications.
- x. Knowledge about business life practices such as project management, risk management, and change management; awareness of entrepreneurship, innovation; knowledge about sustainable development.
- xi. Knowledge about the effects of engineering applications on health, environment, and safety in universal and social aspects and the problems of the age reflected in the field of engineering; awareness of the legal implications of engineering solutions.
